

Complete PCI Express® Testing for Electrical Compliance & Cross-layer Debugging

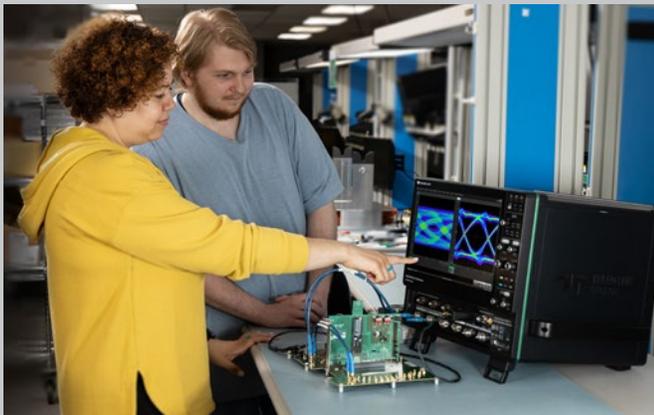

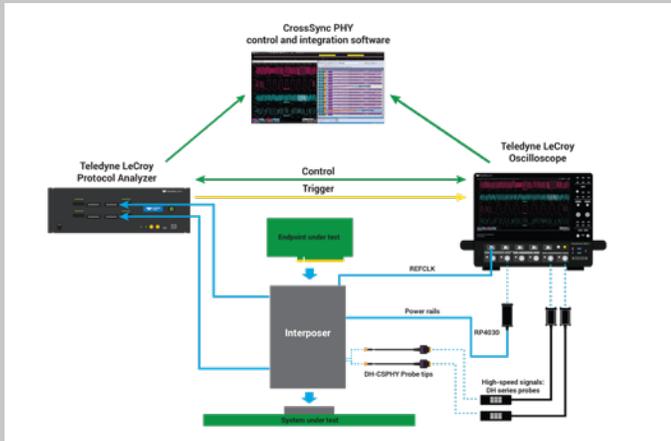

Teledyne LeCroy is the only company that provides PCIe test across the layers – protocol to physical – while also providing superior instruments with sophisticated jitter, eye diagram, debug and compliance software.

- Approved PCIe®, CXL®, and NVMe™ base and compliance test solutions
- Simplified PCIe link testing with more visibility of complex PCIe behaviors
- Most confidence for PCIe physical layer compliance and interoperability testing
- Built-in PCIe test expertise using SDA Expert

Simplified PCIe Link Testing with More Visibility of Complex PCIe Behaviors

Seamlessly merge the functions of your protocol analyzer and oscilloscope.

- Validate and debug active PCIe link operation
- Quickly resolve PCIe interoperability issues by capturing the entire PCIe protocol stack
- Analyze PCIe link training with integrated physical layer and protocol views

Most Confidence for PCIe Physical Layer Compliance and Interoperability Testing

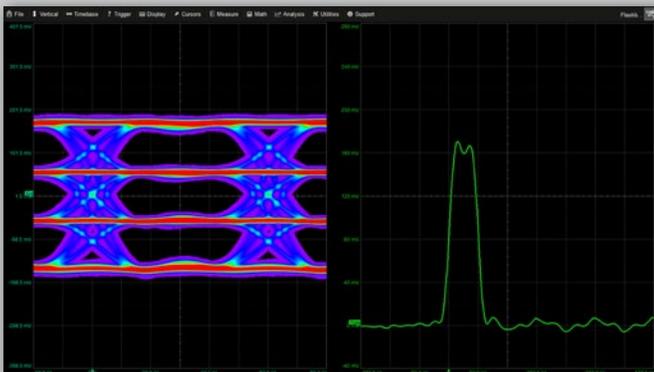

Perform PCIe compliance testing with high accuracy.

- Approved solutions for all PCIe compliance tests and CXL compliance tests
- Fully automated Transmitter, Receiver and Link Equalization testing
- Easily transition from PCIe compliance testing to PCIe debug with SDA Expert

Built-in PCIe Test Expertise Using SDA Expert

Contains specialized features for PCIe testing.

- Comprehensive PCIe eye diagrams, jitter and other PCIe measurements
- Simple, powerful PCIe transmitter equalization analysis
- Most complete PCIe SNDR (Signal-to-Noise-and-Distortion Ratio)

PCIe Test That Crosses the Layers

Teledyne LeCroy's PCI Express electrical and cross-layer test solutions combine superior instruments with sophisticated analysis software.

CROSS-LAYER ANALYSIS AND CrossSync™ PHY

Cross-layer analysis is simultaneous, time-correlated analysis of physical layer and protocol. CrossSync™ PHY is Teledyne LeCroy's name for the technologies that seamlessly merge the functions of your protocol analyzer and oscilloscope.

CrossSync PHY Summary

CrossSync PHY uses a single PCIe interposer and software interface to unify oscilloscope and protocol analyzer views.

- CrossSync PHY PCIe interposers enable observation of both electrical and protocol behavior without disturbing the link
- Sideband signals, reference clock and power rails are all easily accessible to oscilloscope probes
- High-bandwidth oscilloscope probing points are provided for data lanes to allow debug during PCIe link training failures

How Are Layers Time Correlated?

Cross triggering is provided between the protocol analyzer and the oscilloscope, and built-in software makes minor timing corrections.

- Trigger protocol analyzer and oscilloscope captures on the same high-level event using the powerful triggering capabilities of the protocol analyzer
- Easily measure timing relationships between protocol and electrical domains.
- Faster root-cause analysis means fewer costly finger-pointing exercises.

Click to Watch Video: teledynelecroy.com/pci-electrical-test/?wvideo=mac6loase0

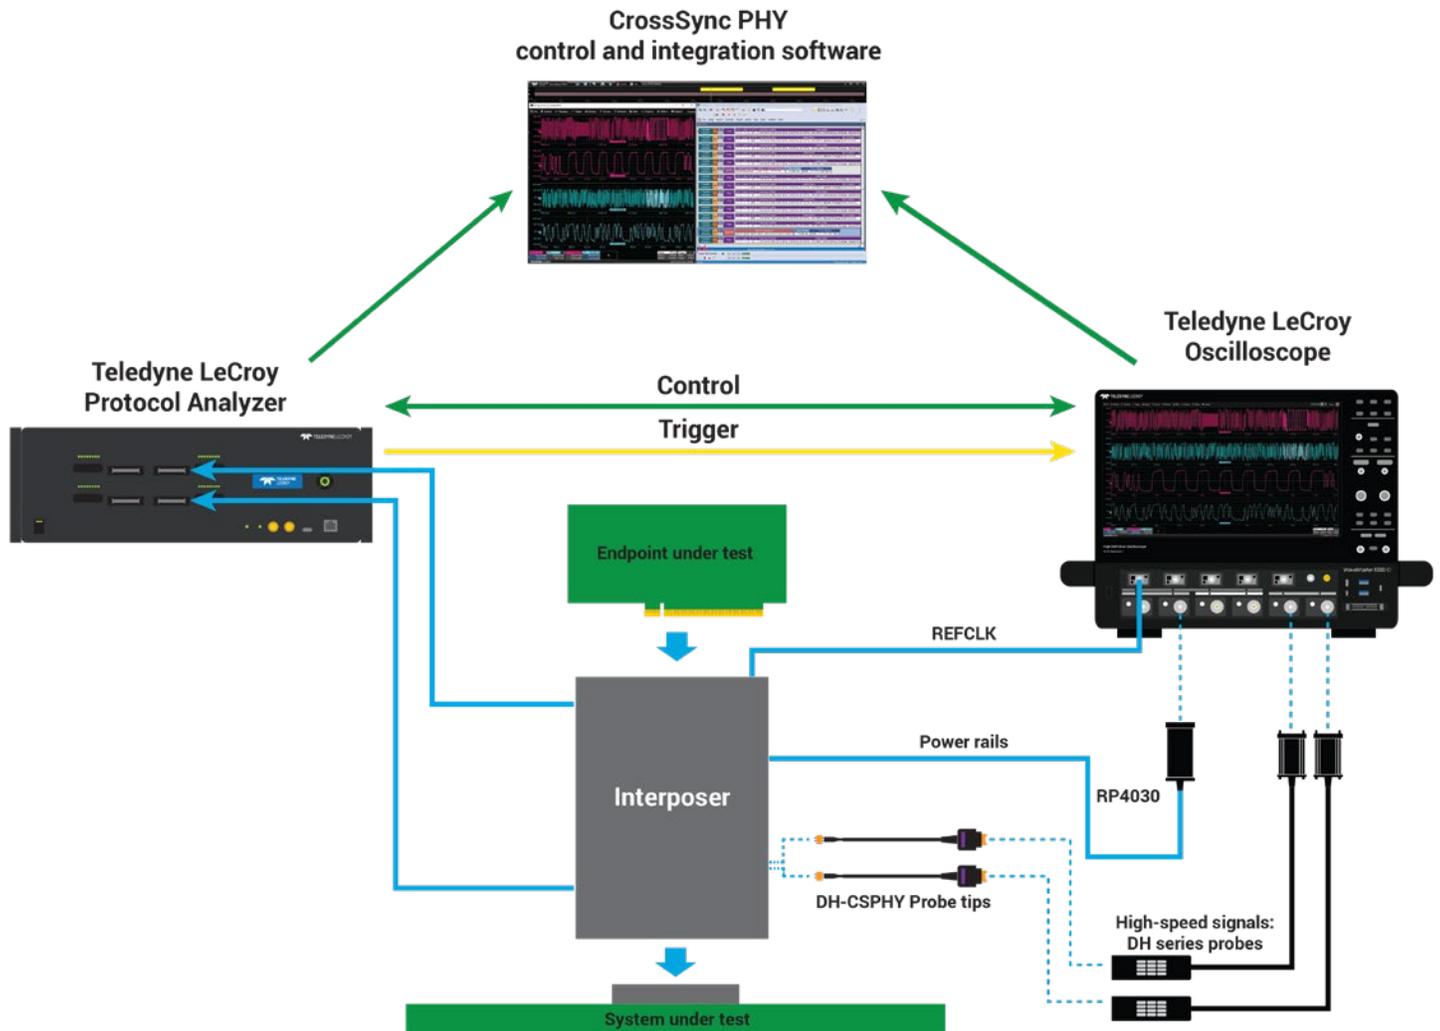

How Will This Help with Debug?

CrossSync PHY for PCIe provides one time-correlated view of all protocol traces and oscilloscope waveforms making it easy to gain deep insight into link training.

- Observe electrical-level results of protocol-level commands
- Combined navigation means always knowing which protocol and electrical behaviors happen at the same time
- No single instrument can deliver this level of cross-layer insight into link training

SIMPLIFIED PCIe LINK TESTING WITH *CrossSync*™ PHY

CrossSync PHY gives deeper insight and more visibility into the most complex behaviors in a PCI Express link. Link training, retimer operation, power-on operations, and power management transitions all involve interactions between protocol and electrical layers.

CrossSync PHY Benefits

CrossSync PHY is the first and only capability to seamlessly merge a protocol analyzer and oscilloscope and provide simultaneous and time-correlated views of both protocol and electrical/physical layer waveforms while retaining all of the powerful capabilities of both instruments.

- Validate and debug active link operation
- Debug PCIe retimers and PCIe retimer latency errors
- Quickly resolve interoperability issues by capturing the entire protocol stack
- Analyze PCIe link training with integrated physical and protocol views

CrossSync™ PHY APPLICATION EXAMPLES

Dynamic Link Behavior

Gain further insight into the link behavior while the device negotiates through the various PCIe LTSSM and other training sequences.

- Characterize entire boot sequence with visibility into sideband signals, reference clock, data lanes and power rails
- Observe speed changes in both electrical and protocol domains
- Trigger on problematic link training behaviors and analyze their consequences through the entire protocol stack

Power Management Transitions

Understand the impact of a PCIe power management transition on the PCIe system's electrical behaviors.

- Quick and easy triggering and capture of both protocol and electrical behavior as a device enters or exits low-power states
- Precise timing measurements between protocol commands and electrical behaviors of reference clock and high-speed data lines
- Dynamic power analysis through Power Management transitions including L1 substates

Dynamic Power Characterization

Capture PCIe system's low voltage power rails in conjunction with protocol events to find power integrity problems.

- CrossSync PHY interposers have built-in rail voltage and current measurement points
- Voltage and current waveforms are synchronized and time-correlated to protocol analyzer trace
- Oscilloscope tools enable measurement of dynamic power consumption and power integrity metrics
- Compatible with RP4060 Active Voltage Rail probe

BUILT-IN PCIE TEST EXPERTISE USING SDA EXPERT

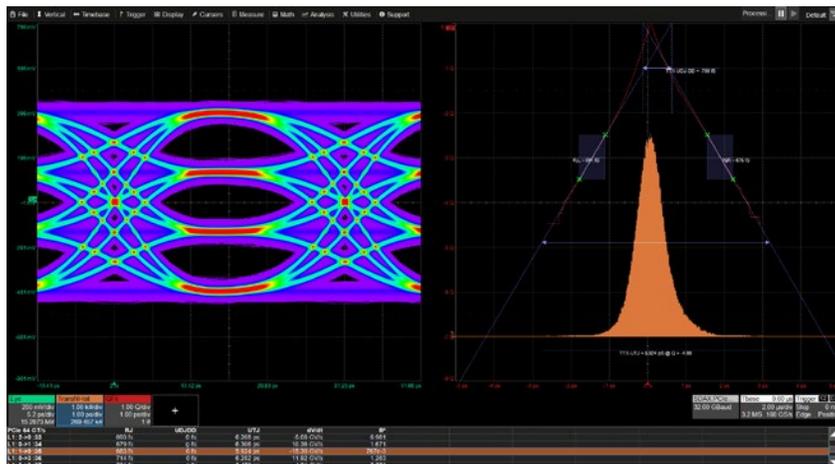

Transmitter characterization is a crucial process to validate the integrity of the transmitter. SDA Expert Serial Data Analysis and the SDAX-PCIE6 or SDAX-PCIE-NRZ options provide the best debug toolset.

Tx Equalization

Unique PCIe transmitter equalization measurements characterize the applied de-emphasis and preshoot.

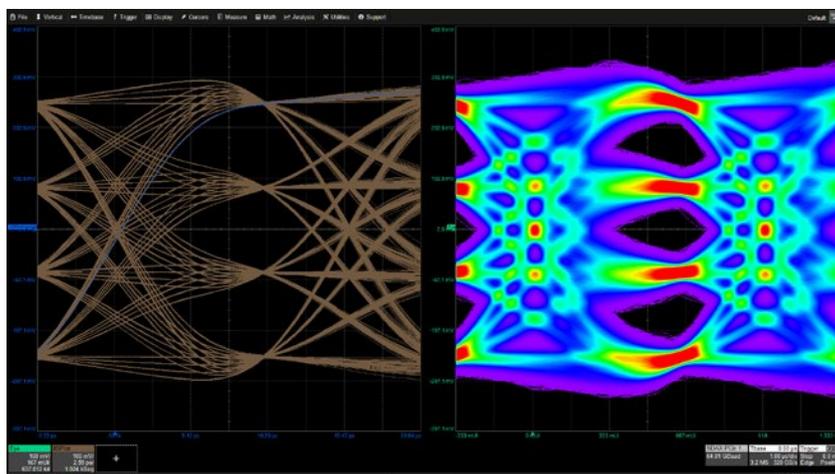

- Reference and measured pulse response
- Reference and measured step response
- Display preset measurement units in dB or coefficient values

Jitter Measurements

The highest confidence PCIe jitter measurements for NRZ or PAM4 signals with complete measurements for PAM4 transitions.

- Breakdown the jitter measurement composition into the 48 transitions in the 52-UI jitter measurement pattern, 12 voltage level transitions, or a single aggregated set of jitter measurements
- Transition histogram for each of the 48 transitions in the 52-UI jitter measurement pattern
- Each of the 52 measurement table results are locked to its respective transition histogram

SNDR Measurements

PCIe 6.0 PAM4 signaling increases the impact of the noise at the receiver, requiring low noise measurements for accurate SNDR calculations.

- WaveMaster 8000HD oscilloscopes have 12-bit resolution with low noise - essential for accurate PAM4 measurements
- Highest precision and most accurate noise removal method (using attenuator) – unique to Teledyne LeCroy
- SNDR measurement methodology is current with evolving PCI-SIG requirements

BEST PCIE 7.0 ELECTRICAL TEST TOOLS

PAM4's multiple vertical levels requires higher resolution and lower noise at high bandwidth with additional signal fidelity measurements. Teledyne LeCroy meet these challenges.

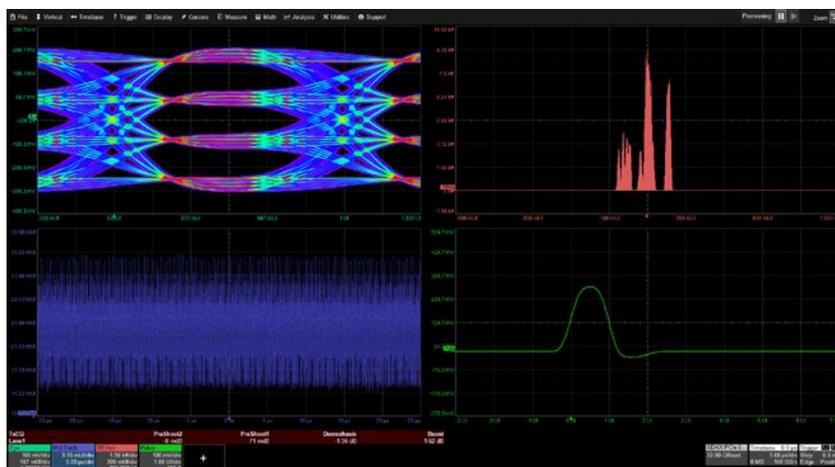

The PCIe Industry Leader

Teledyne LeCroy is the PCIe industry leader in developing PCIe test tools.

- Proven track record of first-to-market PCIe test solutions
- Continuous engagement with PCI-SIG working groups to closely track PCIe 7.0 base specification
- Complete test coverage from PHY through protocol and in between

Click to Watch Video: teledyneleeroy.com/pcie-electrical-test/?wvideo=lgk6bxjh6q

Most Complete Serial Data Toolbox

Simplify first silicon validation with the most complete serial data toolbox.

- 4th generation toolset covers complete needs for NRZ and PAM
- Integrates everything – jitter, noise, crosstalk, equalization, and pulse response
- Unique multi-view support with reference and comparison modes

Most Accurate PAM Signal Characterization

High-resolution acquisitions with the most accurate noise removal method.

- 12-bit resolution at required 65 GHz oscilloscope bandwidth
- Precise amplitude resolution for accurate measurement of PAM4 signal levels
- Highest precision and most accurate noise removal method

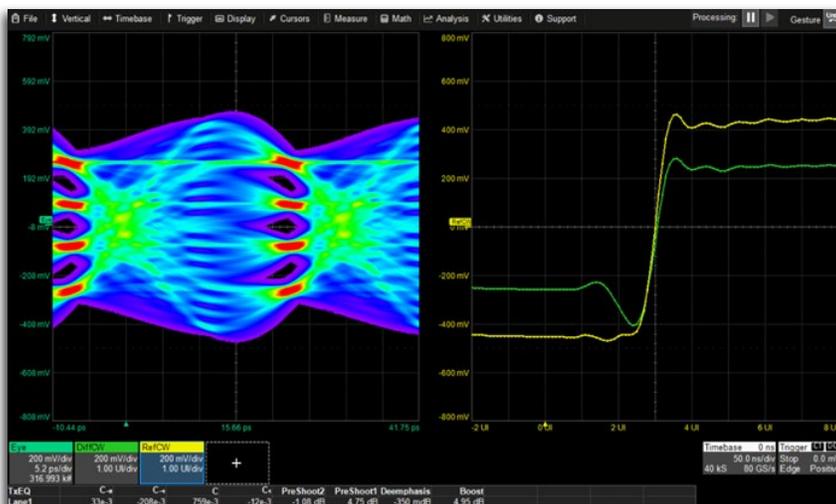

ACCELERATE YOUR PCIe 6.0 TESTING

Teledyne LeCroy's PCIe 6.0 electrical and protocol test solutions cover the entire design cycle from first article power on and validation through compliance testing and the most complete interoperability validation and debug.

PCIe 6.0 Compliance Testing in a Fraction of the time

PCI-SIG® approved compliance testing using the QualiPHY® 2 automated compliance test framework.

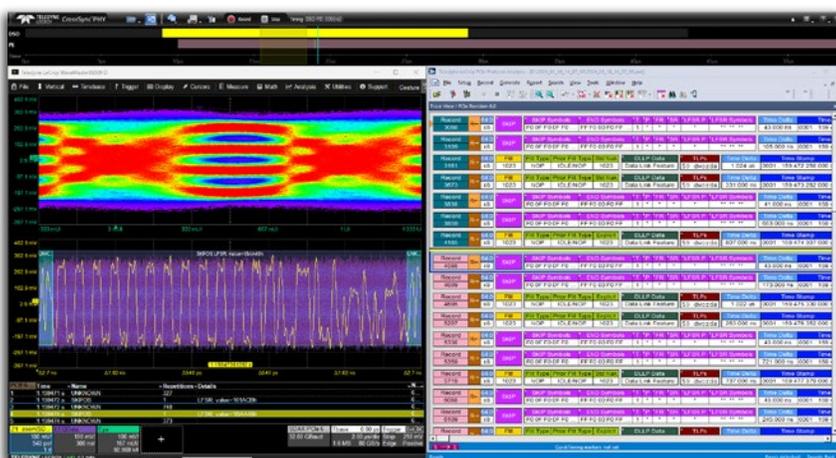

- Unified Tx/Rx compliance test framework
- Automated PCIe 6.0 test fixture characterization eliminates errors
- Simplified test interface
- Compliance on time from anywhere

Built-in PCIe 6.0 Test Expertise Using SDA Expert

Specialized PCIe 6.0 measurements for characterizing signals.

- Tx equalization analysis with pulse and step responses
- Specialized PCIe 6.0 specific PAM4 jitter, SNDR and RLM measurements
- Apply user defined patterns to make nonstandard PCIe measurements
- Multiple pattern detection methodologies to increase the measurement accuracy

Simplified PCIe 6.0 Link Testing with More Visibility of Complex Behaviors

Seamlessly merge the functions of your protocol analyzer and oscilloscope.

- Validate and debug active PCIe 6.0 link operation
- Quickly resolve PCIe interoperability issues by capturing the entire PCIe protocol stack
- Analyze PCIe link training with integrated physical layer and protocol views

PCIe 5.0 THROUGH 1.0 ELECTRICAL TESTING

Go beyond PCIe compliance test and maximize your PCIe interoperability expertise for all form factors with cross-layer analysis to isolate problems to either physical layer or protocol, from the root complex (systems) to add-in cards.

PCIe Compliance Testing in a Fraction of the time

PCI-SIG approved compliance testing using the QualiPHY 2 automated compliance test framework.

- Unified Tx/Rx compliance test framework
- Automated PCIe 6.0 test fixture characterization eliminates errors
- Simplified test interface
- Compliance on time from anywhere

Support for All PCIe Tests, All Form Factors, All Devices

Comprehensive PCIe embedded test and PCIe debugging.

- Support for CEM, U.2, and M.2 form factors
- Visibility from electrical through transaction layer with decoders and protocol analysis software
- Test the full range of PCIe device types: endpoints, add-in cards, root complex, systems, retimers and switches.

Simplified PCIe Link Testing with More Visibility of Complex Behaviors

Seamlessly merge the functions of your protocol analyzer and oscilloscope.

- Validate and debug active PCIe link operation
- Quickly resolve PCIe interoperability issues by capturing the entire PCIe protocol stack
- Analyze PCIe link training with integrated physical layer and protocol views

EXPERIENCE, LEADERSHIP, SUPPORT

Combining the Teledyne LeCroy WaveMaster 8000HD Oscilloscope, WavePulser 40iX interconnect analyzer and QualiPHY 2 automated compliance test software with the Anritsu SQA-R MP1900A BERT results in the most powerful characterization, compliance and debug solution available.

WaveMaster 8000HD Oscilloscope

WaveMaster 8000HD series oscilloscopes supports all generations of PCIe transmitter and receiver testing at all required bandwidths.

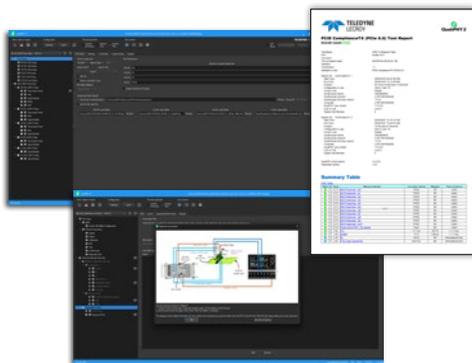

- 65 GHz for PCIe 7.0 (128 GT/s)
- 50 GHz for PCIe 6.0 (64 GT/s) and PCIe 5.0 (32 GT/s)
- 25 GHz for PCIe 4.0 (16 GT/s)
- 13 GHz for PCIe 3.0 (8 GT/s)

WavePulser 40iX Interconnect Analyzer

WavePulser 40iX High-speed Interconnect Analyzer automates the entire PCIe test fixture characterization process, reduces errors and saves time.

- Network analysis from DC to 40 GHz
- Built-in automatic calibration
- Controlled by QualiPHY 2 compliance test software to make all PCIe test fixture characterization measurements and calculations

QualiPHY 2 Compliance Software

QualiPHY 2 automated compliance test software fully automates all aspects of PCIe electrical compliance testing

- Transmitter and receiver link equalization testing
- Receiver calibration
- Report generation
- PCIe test fixture characterization

Anritsu SQA-R MP1900A BERT

Anritsu SQA-R MP1900A series BERT supports all-in-one PCIe transmitter equalization validation and PCIe receiver testing.

- Jitter and noise generation for Rx calibration and bit error rate (BER) testing
- High quality waveform PPG with integrated 10-tap emphasis
- LTSSM loopback and Error detector with variable CTLE for PCIe Rx testing

OTHER EQUIPMENT, TECHNOLOGIES AND SERVICES

Other Equipment, Technologies and Services Related to PCI Express Deployment

Compute Express Link® (CXL®), and Nonvolatile Memory Express (NVMe™) use PCIe physical layer signaling. Additionally, Teledyne LeCroy provides protocol analyzers and related equipment, training and services, and other electrical test solutions for technologies commonly deployed with PCIe. Use the links below to learn more.

Test Instruments	33 GHz oscilloscope Protocol analyzer	WaveMaster 8330HD Summit T516
Software Options	PCIe CrossSync PHY protocol analyzer synchronization	CROSSSYNC-PHY-PCIE
Hardware Accessories	PCIe 5.0 U.2/U.3 12 inch Interposer	PE221UIA-X
	PCIe 5.0 U.2/U.3 12 inch Interposer CrossSync PHY upgrade	PE130ACA-X
	Y-Cable for connecting Summit T516 to PE130ACA-X	PE028UCA-X
	30 GHz differential probe with ProAxial interface	DH30-PX
	Probe tip to connect DH series oscilloscope probe to PE130ACA-X	DH-CSPHY-PCIE5-U2U3
	4 GHz Power/Voltage Rail Probe	RP4030
Additional Debug & Characterization Tools	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe	SDAX-COMLETE
	SDA Expert Technology Framework for PCIe NRZ	SDAX-PCIE-NRZ
	PCI Express Protocol Link Layer Decode Annotation	PCIEBUS D
	Decode Annotation and Protocol Analyzer Software Sync Option	PROTOSYNC
	Clock Expert Jitter Analysis Framework with SSC, Phase Noise and Accumulated Jitter Analysis	CLOCK-X-PRO
	PCI-SIG Sigtest Phoenix 5.1.08	intel.com/content/www/us/en/collections/technology/high-speed-io-tools.html
32 GT/s (PCI Express 5.0)		
EDSFF – CrossSync PHY		
Test Instruments	33 GHz oscilloscope Protocol analyzer	WaveMaster 8330HD Summit T516
Software Options	PCIe CrossSync PHY protocol analyzer synchronization	CROSSSYNC-PHY-PCIE
Hardware Accessories	PCIe 5.0 x4 EDSFF E1.S Interposer or PCIe 5.0 x8 EDSFF E1.L Interposer or PCIe 5.0 x16 EDSFF E3.x Interposer	PE243UIA-X or PE241UIA-X or PE135ACA-X
	PCIe 5.0 x4 EDSFF E1.S, x8 EDSFF E1.L, and x16 EDSFF E3.x Interposers CrossSync PHY upgrade	PE135ACA-X
	Y-Cable for connecting Summit T516 to PE135ACA-X	PE028UCA-X
	30 GHz differential probe with ProAxial interface	DH30-PX
	Probe tip to connect DH series oscilloscope probe to PE135ACA-X	DH-CSPHY-PCIE5-EDSFF
	4 GHz Power/Voltage Rail Probe	RP4030
Additional Debug & Characterization Tools	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe	SDAX-COMLETE
	SDA Expert Technology Framework for PCIe NRZ	SDAX-PCIE-NRZ
	PCI Express Protocol Link Layer Decode Annotation ()	PCIEBUS D
	Decode Annotation and Protocol Analyzer Software Sync Option	PROTOSYNC
	Clock Expert Jitter Analysis Framework with SSC, Phase Noise and Accumulated Jitter Analysis	CLOCK-X-PRO
	PCI-SIG Sigtest Phoenix 5.1.08	intel.com/content/www/us/en/collections/technology/high-speed-io-tools.html
2.5 to 64 GT/s (PCI Express 6.0 to 1.0)		
System – Reference Clock Testing		
Test Instruments	5 GHz or higher oscilloscope	WavePro 604HD or any WaveMaster 8000HD
Software Options	Oscilloscope compliance automation software	Any QPHY2-PCIEx software option
	PCI-SIG clock jitter tool software	intel.com/content/www/us/en/collections/technology/high-speed-io-tools.html
Hardware Accessories	1 x PCIe 6.0 CEM fixture kit	pcisig.com
Additional Debug & Characterization Tools	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe	SDAX-COMLETE
	Clock Expert Jitter Analysis Framework with SSC, Phase Noise and Accumulated Jitter Analysis	CLOCK-X-PRO

RECOMMENDED TEST EQUIPMENT

Product Description **DUT Type – Test Type** **Product Code**

64 GT/s (PCI Express 6.0)

	Add-In Card / System – Tx Testing	Add-In Card – PLL Testing	
Test Instruments	50 GHz oscilloscope	50 GHz oscilloscope	WaveMaster 8500HD
	–	Anritsu Signal Quality Analyzer-R (BERT)	MP1900A
Software Options	Oscilloscope compliance automation software PCI-SIG Sigtest Phoenix 6.x.xx	Oscilloscope compliance automation software	QPHY2-PCIE6-TX-RX intel.com/content/www/us/en/collections/technology/high-speed-io-tools.html
Hardware Accessories	1 x PCIe 6.0 CEM fixture kit (2.92mm kit) 1 x ATX Power supply 1 x TF-PCIE4-CTRL automation controller	1 x PCIe 6.0 CEM fixture kit (2.92mm kit) 1 x ATX Power supply 1 x TF-PCIE4-CTRL automation controller	pcisig.com
Additional Debug & Characterization Tools	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe PAM Serial Data Expert Analysis Framework, Eye, Jitter and Noise Measurements SDA Expert Technology Framework for PCIe 6.0 PCI Express 6.0 to 1.0 Protocol Link Layer Decode Annotation	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe PAM Serial Data Expert Analysis Framework, Eye, Jitter and Noise Measurements SDA Expert Technology Framework for PCIe 6.0	SDAX-COMLETE SDAX-PAM SDAX-PCIE6 PCIE6BUS D

64 GT/s (PCI Express 6.0)

	Add-In Card / System – LEQ Testing	
Test Instruments	50 GHz oscilloscope	WaveMaster 8500HD
	Anritsu Signal Quality Analyzer-R (BERT)	MP1900A
Software Options	Oscilloscope compliance automation software PCI-SIG Sigtest Phoenix 6.x.xx	QPHY2-PCIE6-TX-RX intel.com/content/www/us/en/collections/technology/high-speed-io-tools.html
	Seasim 2.0.103f	pcisig.com
Hardware Accessories	1 x PCIe 6.0 CEM fixture kit (2.92mm kit) 1 x ATX Power supply 1 x TF-PCIE4-CTRL automation controller 1 x Anritsu Clock Buffer Z2029A (for system tests) 2 Pairs x Phase match 1ft 2.92mm (male) to 2.92mm (male) cables 4 Pairs x Phase match 1m 2.92mm (male) to 2.92mm (male) cables 2 x 1m 2.92mm (male) to BNC cable (male) 4 x 2.92mm (female) to MMPX (male) adapters 2 x 40 GHz DC blocks 2 x 50/50 Power splitters 1 x 50 Ohm SMP terminator	pcisig.com
Additional Debug & Characterization Tools	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe PAM Serial Data Expert Analysis Framework, Eye, Jitter and Noise Measurements SDA Expert Technology Framework for PCIe 6.0 PCI Express 6.0 to 1.0 Protocol Link Layer Decode Annotation	SDAX-COMLETE SDAX-PAM SDAX-PCIE6 PCIE6BUS D

64 GT/s (PCI Express 6.0)

	CEM – CrossSync PHY	
Test Instruments	50 GHz oscilloscope	WaveMaster 8500HD
	Protocol analyzer	Summit M616
Software Options	PCIe CrossSync PHY protocol analyzer synchronization	CROSSSYNC-PHY-PCIE
Hardware Accessories	PCIe 6.0 CEM x16 interposer PCIe 6.0 CEM x16 interposer CrossSync PHY upgrade Y-Cable for connecting Summit M616 to PE6817ACA-X 30 GHz differential probe with ProAxial interface Probe tip to connect DH series oscilloscope probe to PE6817ACA-X 4 GHz Power/Voltage Rail Probe	PE6117UIA-X PE6817ACA-X PE028UCA-X DH30-PX DH-CSPHY-PCIE6 RP4030
Additional Debug & Characterization Tools	Oscilloscope compliance automation software Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe PAM Serial Data Expert Analysis Framework, Eye, Jitter and Noise Measurements SDA Expert Technology Framework for PCIe 6.0 PCI Express 6.0 to 1.0 Protocol Link Layer Decode Annotation Clock Expert Jitter Analysis Framework with SSC, Phase Noise and Accumulated Jitter Analysis PCI-SIG Sigtest 6.1.11	QPHY2-PCIE6-TX-RX SDAX-COMLETE SDAX-PAM SDAX-PCIE6 PCIE6BUS D CLOCK-X-PRO intel.com/content/www/us/en/collections/technology/high-speed-io-tools.html

128 GT/s (PCI Express 7.0)

	Add-In Card / System – Tx Testing	Add-In Card – PLL Testing	
Test Instruments	65 GHz oscilloscope	65 GHz oscilloscope	WaveMaster 8650HD
	–	Anritsu Signal Quality Analyzer-R (BERT)	MP1900A
Characterization Tools	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe PAM Serial Data Expert Analysis Framework, Eye, Jitter and Noise Measurements	Bundle - Multi-Lane SDA Expert Framework, incl. Eye, Jitter, Noise, Crosstalk Measurements and VirtualProbe PAM Serial Data Expert Analysis Framework, Eye, Jitter and Noise Measurements	SDAX-COMLETE SDAX-PAM

Customer Service

Teledyne LeCroy oscilloscopes and probes are designed, built, and tested to ensure high reliability. In the unlikely event you experience difficulties, our digital oscilloscopes are fully warranted for three years and our probes are warranted for one year.

This warranty includes:

- No charge for return shipping
- Long-term 7-year support
- Upgrade to latest software at no charge

1-800-5-LeCroy
