

2U 6.4T DCI BOX 2.0

The GIGALIGHT 2U 6.4T DCI BOX 2.0 is an open coherent DWDM optical transport platform for data center interconnect (DCI) and metro optical transmission applications.

Description	Specifications	Related Products
-------------	----------------	------------------

- 2U chassis including both optical-layer and electrical-layer cards to save space and facilitates capacity expansion
- Front-to-back heat dissipation design with multiple sets of high-speed fans to ensure excellent heat dissipation performance
- Optional with optical layer cards such as EDFA, WSS and OLP etc.
- Optional with electrical layer cards such as 100G OTU, 200G OTU and 400G OTU
- Up to 6.4T bandwidth for total 2U chassis
- Supports SNMP/Netconf, CLI/Web/BS, dual-master backup and OSC communication
