EPS1000-50M Depolarizer

- **50 Mrad/s** version with 2 QWPs (10 Mrad/s) + 1 HWP (50 Mrad/s)
- Sets of periodic electrode voltages with integer relative driving frequencies, for instance [2, 3, −2]
- Depolarization in **960...240 ns** interval
- Independent of input polarization

Mean and maximum degree-of-polarization (DOP) obtained with 1000 random input polarizations
