

Flexible Grid Twin 1xN/2xN WSS Modules for C, L and C+L Band

MLC30 Twin 3x33 C+L WSS

- 200+ channels covering the C+L operating regions
- Configurable with 2 common ports + auxiliary port
- Each common port can be C, L, or C+L Band
- Standard flexible grid of 3.125 GHz
- Flexible grid resolution of 0.5 GHz
- in MaxGrid mode
- Athermal design without thermal management
- Low power consumption
