

OE4060

HI-Q® RED LASER

The OEwaves OE4060 red laser delivers single-frequency output in the visible spectrum with ultra-low noise and integrated low RAM modulation—eliminating laser noise as a limiting factor. Designed for compact, high-performance systems, it accelerates development and precision across demanding optical applications.

Specifications

Wavelength range: 640 nm – 700 nm

Spectral linewidth: Sub-Hz to 10 Hz

Thermal tuning range : ≤ 10 GHz (Mode hop free)

Monitor / control interface : USB

Integrated laser driver and controller

Fiber coupled output
