

EVK02001

For RF Module BFM02003* and RFIC TRXBF02

Everything is included for straight forward operation and will enable the user to quickly validate beam steering capabilities together with other system defining RF parameters – critical features when developing a new product with tough requirements on time to market.

Technical Specifications

RF Module EVK 'Plug and Play' Platform

- 5G NR Transceiver RFIC
- Patch antenna RF module

Used to evaluate Siivers Semiconductors beam steering RFIC - TRXBF02 - licensed 5G

- 24.0-29.5 GHz

Graphical User Interface (GUI)/software for easy configuration and display of results

** The RF module is not a commercial product, only part of the EVK.*
